LOGICAL REASONING

Type I Method

In this type of questions two statements • followed by two conclusions are given. You have to take the given statements to be true even if they seem to be at variance from commonly known facts and then to decide which of the given conclusions logically follows from the given two statements, disregarding commonly known facts.

Such questions should be solved as far as possible by Venn diagrams. On the basis of statements draw as many Venn diagrams as possible, then the conclusions should be considered in the light of those drawn Venn diagrams. The conclusions, which are confirmed by all Venn diagrams, are correct.

The following example will illustrate the idea clearly.

Example: Two statements given below are followed by two conclusions (I) and (II). Find out which of the two conclusions logically follows from the given statements. Give answer (a) if only conclusion (I) follows; (b) if only conclusion (II) follows; (c) if both (I) and (II) follow; (d) if either (I) or (II) follows and (e) if neither (I) nor (II) follows.

Statements: (i) No boy is thief.
(ii) Some men are thieves

Conclusions: (I) Some men are not boys,
(II) Some thieves are not men.

Answer with Explanation (a): From the two statements at the most only following five Venn diagrams are possible:

From the above five figures it is clear, that some part of the circle of men is separate from the circle of boys, therefore, 'some men are not boys' is confirmed. But some part of the circle of thieves is separate from the circle of men in some figures while it is not separate in other figures. Therefore, conclusion II is not confirmed.

Examples

Directions (Q. 1-6): In each of the following questions there are two statements followed by two conclusions (I) and (II). You have to take these two statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts. If only conclusion (I) follows from the statement then mark A; if only conclusion (II) follows then mark B; if both (I) and (II) follow then mark C; if either (I) or (II) follow then mark D; and if neither (I) nor (II) follows, then mark E.

1. Statements: (i) Mohan is a good sportsman.
(ii) Sportsman are generally healthy.

Conclusions: (I) All healthy persons are sportsman.
(II) Mohan is healthy.

(a) A  (b) B  (c) C  (d) D  (e) E
2. Statements: (i) Some men are educated.  
(ii) Educated persons prefer small families.
Conclusions: (I) All small families are educated.  
(II) Some men prefer small families.
(a) A (c) C (e) D

3. Conclusions: (i) All men are chairs,  
(ii) All chairs are tables.
(a) A (c) C (e) E
Statements:

4. Statements: (i) All boys are rivers.  
(ii) Some rivers are girls.
Conclusions: (I) Some girls are boys.  
(II) Some boys are girls.
(a) A (c) D (e) B

5. Statements: (i) All birds are parrots.  
(ii) Shyam is a parrot.
Conclusions: (I) Shyam is a bird.  
(II) All parrots are birds.
(a) A (c) C (e) D

6. Statements: (i) Some bags are cigarettes.  
(ii) Some non-bags are tables.
Conclusions: (I) Some bags are tables.  
(II) All bags are not cigarettes.

Directions (Q. 7-11): In the following questions, there are two statements followed by two conclusions (I) and (II). You have to take these two statements to be true even if they seem to be at variance from commonly known facts and then decide which one of the given conclusions logically follows from the given statements. Give answer:

(a) if only conclusion (I) follows;  
(b) if only conclusion (II) follows;  
(c) if either (I) or (II) follows;  
(d) if neither (I) nor (II) follows;  
(e) if both (I) and (II) follow.

Statements: (i) Some pots are rats.  
(ii) All rats are bricks.
Conclusions: (I) Some rats are bricks.  
(II) All pots are not bricks.
(a) A (b) B (c) D (d) E

8. Statements: (i) All apples are bananas.  
(ii) All bananas are sweet.
Conclusions: (I) Some apples are sweet.  
(II) Some bananas are apples.
(a) A (b) B (c) C (d) D (e) E

9. Statements: (i) All fans are tables.  
(ii) No table is costly.
Conclusions: (I) All tables are fans.  
(II) No fan is costly.
(a) A (b) B (c) C (d) D (e) E

10. Statements: (i) All dogs are cats.  
(ii) Some cats are black.
Conclusions: (I) Some dogs are black.  
(II) Some cats are dogs.
(a) A (b) B (c) C (d) D (e) E

11. Statements: (i) Some poets are fools.  
(ii) All fools are goats.
Conclusions: (I) Some poets are goats.  
(II) Some fools are poets.
(a) A (b) B (c) C (d) D (e) E

Directions (Q. 12-16): In the following questions, two statements are given followed by two conclusions, (I) and (II). You have to consider the two statements to be true, even if they seem to be at variance from commonly known facts. You are to decide which of the given conclusion definitely follows from the given statements. Indicate your answer as (a) if only (I) follows; (b) if only (II) follows, (c) if neither (I) nor (II) follows, or (d) if both I and II follow, (e) either (I) or (II) follows.

Statements: (i) Some tables are glasses.  
(ii) All trees are tables.
Conclusions:

12. Statements: (i) Some trees are glasses.  
(II) Some glasses are trees.
13. Statements:
   (i) No man is a donkey.
   (ii) Ramesh is a man. Conclusions: (I) Ramesh is not a donkey.
       (II) All men are not Ramesh.

14. Statements:
   (i) All boys are mothers
   (ii) All mothers are fathers. Conclusions: (I) All mothers are boys
       (II) All boys are fathers.

15. Statements:
   (i) Some aeroplanes are living beings.
   (ii) Some non-living beings are ghosts.
Conclusions: (I) Some aeroplanes are ghost,
       (II) Some aeroplanes are not ghosts.

16. Statements: (i) All pots are cups.
   (ii) All cups are bowls. Conclusions: (I) All cups are pots.
       (II) All pots are bowls.

Directions (Q. 17-21): In each question below, are given two
(I) and (II). You have to take the two given statements to be true even if
facts and then decide which of the given conclusions logically follows
commonly known facts. Give answer
(a) if only conclusion (I) follows; give answer (b) if only
or (II) follows; give answer (d) if neither (I) nor (II) follows, and give
(i) Some chairs are rabbits.
(ii) Table is a chair.
   (I) Some rabbits are chairs
   (II) Table is not a rabbit.
   (i) All peacocks are cookers.
   (ii) Some cookers are plates.
   (I) Some peacocks are plates. (II) Some plates are peacocks.
   (i) All plants are flowers.
   (ii) Some flowers are pens.
   (I) All plants are pens.
   (II) Some plants are pens.

17. Statements: (i) All pots are cups.
   (ii) All cups are bowls. Conclusions: (I) All cups are pots.
       (II) All pots are bowls.

18. Statements: (i) All aeroplanes are living.
   (ii) Some living beings are ghosts.
Conclusions: (I) Some aeroplanes are ghost,
       (II) Some aeroplanes are not ghosts.

19. Statements: (i) All pots are cups.
   (ii) All cups are bowls. Conclusions: (I) All pots are bowls.
       (II) All bowls are pots.

20. Statements: (i) All boys are mothers
   (ii) All mothers are fathers. Conclusions: (I) All mothers are boys
       (II) All boys are fathers.

21. Statements: (i) Some aeroplanes are living beings.
   (ii) Some non-living beings are ghosts.
Conclusions: (I) Some aeroplanes are ghost,
       (II) Some aeroplanes are not ghosts.
21. Statements:
   (i) All cars are guns!
   (ii) No gun is rod.

Conclusions: (I) All guns are cars.
   (II) No car is rod.

Directions (Q. 22-26): In each of the questions below, are given two statements followed by two conclusions numbered as (I) and (II). You have to take the given statements to be true even if they seem to be at variance with commonly known facts and then decide which of the given conclusions logically follows from the two statements, disregarding commonly known facts. Give answer

   (a) if only conclusion (I) follows,
   (b) if only conclusion (II) follows,
   (c) if either (I) or (II) follows,
   (d) if neither (I) nor (II) follows,
   (e) if both (I) and (II) follow.

(ii) Golden is an apple.
(I) Some apples are green.
(II) Golden is yellow.
(i) All spoons are plates.
(ii) All plates are trays.
(I) All spoons are trays.
(II) Some trays are spoons.
(i) All trucks fly.
(ii) Some scooters fly.
(I) All trucks are scooters.
(II) Some scooters do not fly.
(i) Some jackals are deers.
(ii) Some deers are tigers.
(I) Some jackals are tigers.
(II) All deers are jackals.
(i) Some crows are dogs.
(ii) All dogs are faithful.
(I) All faithful animals are dogs.
(II) Some crows are faithful.

Directions (Q. 27-32): In each of the questions below, are given two statements followed by two conclusions numbered (I) and (II). You have to take the two given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusion logically follows from the two statements, disregarding commonly known facts. Give answer (a) if only conclusion (I) follows; give answers (b) if only conclusion (II) follows; give answer (c) if either (I) or (II) follows; give answer (d) if neither (I) nor (II) follows and give answer (e) if both (I) and (II) follow.
(i) Some birds are clouds.
(ii) Horse is a bird.
(I) Some clouds are birds.
(II) Horse is not a cloud.
(i) Some birds are clouds.
(ii) Horse is a bird.
(I) Horse is a cloud.
(II) Some clouds are not birds.
(i) All streets are watches.
(ii) All watches are eagles.
(I) All streets are eagles.
(II) All watches are streets.
(i) All streets are watches.
(ii) All watches are eagles.
(I) All eagles are streets.
(II) All eagles are watches.
(i) All tables are ants.
(ii) Some ants are chairs.
(I) Some tables are chairs.
(II) Some chairs are tables.
(i) All tables are ants.
(ii) Some ants are chairs.
(I) All ants are tables.
(II) Some chairs are not ants.

33. Statements:  
(i) All students are boys.  
(ii) No boy is dull.
Conclusions:  
(I) No student is dull.  
(II) There are no girls in the class.
34. Statements:  
(i) All men are tables  
(ii) All tables are graduates.
Conclusions:  
(I) All men are graduates.
(II) All men are men.
35. Statements:  
(i) Some cooks are lazy.  
(ii) All boys are lazy.
Conclusions:  
(I) Some boys are cooks.  
(II) Some cooks are boys.
Statements: 36. Statements: (i) Most trains are gentlemen.
(ii) Some gentlemen are tanks. Conclusions: (I) Some tanks are gentlemen.

Conclusions: (II) Some trains are tanks.

37. Statements: (i) AH holiday are years.
(ii) Some years are stars. Conclusions: (I) All stars are holidays.
(II) All stars are years.

Statements: (i) followed by two conclusions. You have to take these statements to be true even if they seem to be at variance from
(ii) commonly known facts and then decide which of the given conclusions logically follows from the statements. Give

Conclusions: (I) answer (a) if only conclusion (I) follows; (b) if conclusion (II) follows; (c) if either (I) or (II) follows, (d) if neither (I) nor
(II) follows and (e) if both (I) and (II) follow.

38. Statements: (i) Some girls are beautiful. Conclusions: (I) All flowers are beautiful.
(ii) Some flowers are beautiful.

39. Statements: (i) All vehicles are cars.
(ii) No car is costly. Conclusions: (I) All cars are vehicles.
(II) No vehicle is costly.

40. Statements: (i) Some sweets are sweet.
(ii) Some sweets are fruits. Conclusions: (I) Some mangoes are fruits.

41. Statements: (i) All children are boys.
(ii) All boys are players. Conclusions: (I) All children are players.
(II) All boys are players.

42. Statements: (i) All cows are Rambha.
(ii) Some buffaloes are Rambha. Conclusions: (I) All Rambhas are not cows.
(II) Some Rambhas are not buffaloes.

Directions (Q. 33-36): In each of the questions, there are two statements

Directions (Q. 38-42): In each of the questions, there are two statements followed by two conclusions. You have to take the two given statements to be true even if they seem to be at variance with commonly known facts and then decide which of the given conclusions logically follows from the two statements disregarding commonly known facts. Give answer

(a) if only conclusions (I) follows,
(b) if only conclusions (II) follows
43. Statements: (i) All coats are bags.  
   (ii) Some bags are toys.  
   Conclusions: (I) Some bags are coats.  
   (II) Some toys are coats.

44. Statements: (i) Some kites are horses.  
   (ii) All horses are dogs.  
   Conclusions: (I) All dogs are horses.  
   (II) Some dogs are horses.

45. Statements: (i) All books are chairs.  
   (ii) All chairs are pens.  
   Conclusions: (I) All books are pens.  
   (II) Some pens are books.

46. Statements: (i) Some poets are readers.  
   (ii) No reader is wise.  
   Conclusions: (I) No poet is wise.  
   (II) All readers are poets.

47. Statements: (i) Some kites are horses.  
   (ii) All horses are dogs.  
   Conclusions: (I) All dogs are horses.  
   (II) Some dogs are horses.

48. Statements: (i) Some boys are clouds.  
   (ii) Gopal is a boy.  
   Conclusions: (I) Some clouds are boys.  
   (II) Some boys are not clouds.

49. Statements: (i) All streets are aircraft.  
   (ii) All aircraft are parrots.  
   Conclusions: (I) All streets are aircraft.  
   (II) All parrots are aircraft.

50. Statements: (i) Some apples are tables.  
   (ii) Some tables are chairs.  
   Conclusions: (I) Some caps are chairs.  
   (II) Some tables are not apples.

51. Statements: (i) Some boys are clouds.  
   (ii) Gopal is a boy.  
   Conclusions: (I) Gopal is a cloud.  
   (II) Some clouds are not boys.

52. Statements: (i) All streets are aircraft.  
   (ii) All aircraft are parrots.  
   Conclusions: (I) All streets are parrots.  
   (II) All aircraft are streets.

53. Statements: (i) Some essayists are poets.  
   (ii) All poets are dramatists.  
   Conclusions: (I) Some poets are essayists.  
   (II) Some essayists are dramatists.

54. Statements: (i) All eggs are rotten.  
   (ii) All rotten are in bad basket.  
   Conclusions: (I) All the rotten are not eggs.  
   (II) All eggs are in bad basket.

55. Statements: (i) All men are prisoners.  
   (ii) No prisoners are educated.  
   Conclusions: (I) All prisoners are educated.  
   (II) No men are educated.

56. Statements: (i) Some soldiers are famous.  
   (ii) Some soldiers are intelligent.  
   Conclusions: (I) Some soldiers are either famous or intelligent.  
   (II) Some soldiers are neither famous nor intelligent.

57. Statements: (i) Some quicks are ferces.  
   (ii) All ferces are angry.  
   Conclusions: (I) Some quicks are angry.  
   (II) Some ferces are quicks.

Directions (Q. 48-62): In each question below, are given two statements followed by two conclusions (I) and (II). You have to take the given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusions logically follows from the two statements, disregarding commonly known facts.

Give answer (a) if only conclusion (I) follows; give answer (b) if only (II) follows; give answer (c) if either (I) or (II) follows; give answer (d) if neither (I) nor (II) follows; and give answer (e) if both (I) and (II) follow.
logically follows from the two given statements. Give answer
(a) if only conclusion (I) follows;
(b) if only conclusion (II) follows;
(c) if both (I) and (II) follow;
(d) if either (I) or (II) follows,
(e) if neither (I) nor (II) follows.

58. Statements: (i) Some authors are painters.
   (ii) All authors are honest.
   Conclusions: (I) All honest persons are painters.
   (II) Some authors are honest.

59. Statements: (i) All tables are horses.
   (ii) All horses are rivers.
   Conclusions: (I) All tables are rivers.
   (II) Some rivers are tables.

60. Statements: (i) All poets are authors.
   (ii) All singers are authors.
   Conclusions: (I) All singers are poets.
   (II) Some authors are not singers.

61. Statements: (i) All cats are dogs.
   (ii) Some dogs are black.
   Conclusions: (I) Some cats are black.
   (II) Black dogs are not cats.

62. Statements: (i) Some crows are cows.
   (ii) Some cows are cats.
   Conclusions: (I) Some crows are cats.
   (II) All crows are cats. Directions (Q. 63-67): In each questions below, are given two statements followed by two conclusions numbered (I) and (II). You have to take the two given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the two given conclusions logically follows from the two given statements, disregarding commonly known facts. Give answer (a) if only conclusion (I) follows; (b) if only conclusion (II) follows; (c) if either (I) or (II) follows,
   (d) if neither (I) nor (II) follows; and (e) if both (I) and (II) follow.

63. Statements: (i) All pencils are bricks.
   (ii) All bricks are bottles.
   Conclusions: (I) Some bricks are pencils.
   (II) Some bottles are bricks.

64. Statements: (i) All pencils are bricks.
   (ii) All bricks are bottles.
   Conclusions: (I) All pencils are bottles.
   (II) All bricks are pencils.

65. Statements: (i) Some trees are horses.
   (ii) Biscuit is a tree. Conclusions: (I) Biscuit is not a horse.
   (II) Some horses are trees.

66. Statements: (i) All tigers are ships.
   (ii) Some ships are cupboards. Conclusions: (I) Some tigers are cupboards.
   (II) Some cupboards are tigers.

67. Statements: (i) All tigers are ships.
   (ii) Some ships are cupboards. Conclusions: (I) Some ships, are tigers.
   (II) Some cupboards are not ships.

Directions (Q. 68-72): In each of the questions, there are two statements followed by two conclusions. You have to take the two given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the two given conclusions logically follows from the two given statements. Give answer (a) if only conclusion (I) follows; (b) if only conclusion (II) follows; (c) if either (I) or (II) follows,
   (d) if neither (I) nor (II) follows; and (e) if both (I) and (II) follow.

68. Statements: (i) All dogs are chairs.
   (ii) All chairs are tables.
   Conclusions: (I) Some tables are chairs.
   (II) Some chairs are tables.

69. Statements: (i) Some oranges are crows.
   (ii) Some crows are apples.
   Conclusions: (I) Some oranges are apples.
   (II) Some apples are crows.

70. Statements: (i) All dogs are chairs.
   (ii) All chairs are tables.
   Conclusions: (I) All dogs are tables.
   (II) All tables are chairs.

71. Statements: (i) All mangoes are parrots.
   (ii) Some parrots are mangoes.
   Conclusions: (I) No mangoes are green.
   (II) Some mangoes are parrots.

72. Statements: (i) Some pens are birds.
   (ii) All cats are birds.
   Conclusions: (I) Some cats are pens.
   (II) Some birds are pens.

Directions (Q. 73-77): In each of the questions below, are given two statements followed by two conclusions numbered (I) and (II). You have to take the given statements to be true even if they seem to be at variance from commonly known facts and
then decide which of the given conclusions logically follows from the two statements, disregarding commonly known facts. Give answer (a) if only conclusion (I) follows; give answer (b) if only conclusion (II) follows; give answers (c) if either (I) or (II) follows; give answer (d) if neither (I) nor (II) follows and give answers (e) if both (I) and (II) follow.

73. Statements: (i) All mirrors are eggs. (ii) All eggs are bats.
   (I) AH mirrors are bats. (II) AH bats are mirrors.
   (I) Statements: (a) Some ants are trees.
   (ii) All actors are trees.
   (II) Conclusions: (a) Some ants are trees.
       (b) All actors are trees.
       (I) Statements: (i) All lemons are swans.
       (ii) No swan is carpet.
       (II) Conclusions: (I) All lemons are carpets.
          (II) No carpets are lemons.

74. Statements: (i) All mirrors are eggs. (ii) All eggs are bats.
   (I) AH mirrors are bats. (II) AH bats are mirrors.
   (I) Statements: (i) All ants are trees.
   (ii) All actors are trees.
   (II) Conclusions: (a) Some ants are trees.
       (II) All actors are trees.
       (I) Statements: (i) All potatoes are birds.
       (ii) Some potatoes are books.
       (II) Conclusions: (I) All books are potatoes.
          (II) All birds are books.
       (i) Statements: (D) All watches are bricks.
       (ii) All handles are bricks.
       (II) Conclusions: (I) All watches are bricks.
          (II) All handles are watches.

75. Statements: (i) All passengers are men. (ii) All men are graduates.
   (I) All men are passengers. (II) All passengers are graduates.
   (I) Statements: (i) Some dogs bite.
   (ii) All dogs bark.
   (II) Those dogs who do not bark, not necessarily bite.
   (II) Statements: (i) All watches are bricks. (ii) Some potatoes are books.
   (I) Conclusions: (I) All books are potatoes.
      (II) All birds are books.
   (II) Conclusions: (I) All ants are trees.
      (II) All actors are trees.
   (I) Statements: (i) All potatoes are birds.
       (ii) Some potatoes are books.
       (II) Conclusions: (I) All books are potatoes.
          (II) All birds are books.

76. Statements: (i) Some dogs bite. (ii) All dogs bark.
   (I) Those dogs who do not bark, also bite. (II) Those dogs who do not bark, not necessarily bite.
   (I) Statements: (i) Some pens are books.
   (ii) All books are rods. Conclusions: (I) AH pens are rods.
       (II) All rods are pens.
   (II) Conclusions: (I) Some pens are books.
      (II) All books are rods.

77. Statements: (i) Some dogs bite. (ii) All dogs bark.
   (I) Those dogs who do not bark, also bite. (II) Those dogs who do not bark, not necessarily bite.
   (I) Conclusions: (I) All men are hungry wolves.
      (II) All those who are hungry, are wolves
      (II) Conclusions: (I) Some wolves are hungry. Conclusions: (I) All the men are hungry wolves.
         (II) All those who are hungry, are wolves

78. Statements: (i) Some cats are parrots. (ii) No parrot is green.
   (I) All cats are parrots. (II) All parrots are cats.
   (I) Statements: (i) Some pens are books.
   (ii) All books are rods. Conclusions: (I) AH pens are rods.
       (II) All rods are pens.
   (II) Conclusions: (I) Some pens are books.
      (II) All books are rods.

79. Statements: (i) Some cats are parrots. (ii) No parrot is green.
   (I) All cats are parrots. (II) All parrots are cats.
   (I) Statements: (i) Some pens are books.
   (ii) All books are rods. Conclusions: (I) AH pens are rods.
       (II) All rods are pens.
   (II) Conclusions: (I) Some pens are books.
      (II) All books are rods.

80. Statements: (i) Some men are wolves.
   (ii) Some wolves are hungry. Conclusions: (I) All the men are hungry wolves.
   (II) All those who are hungry, are wolves
   (I) Statements: (i) Some pens are books.
   (ii) All books are rods. Conclusions: (I) AH pens are rods.
       (II) All rods are pens.
   (II) Conclusions: (I) Some pens are books.
      (II) All books are rods.

81. Statements: (i) All cats are parrots. (ii) No parrot is green.
   (I) All cats are parrots. (II) All parrots are cats.
   (I) Statements: (i) Some pens are books.
   (ii) All books are rods. Conclusions: (I) AH pens are rods.
       (II) All rods are pens.
   (II) Conclusions: (I) Some pens are books.
      (II) All books are rods.

82. Statements: (i) All cats are parrots. (ii) No parrot is green.
   (I) No cat is green. (II) All parrots are cats.
   (II) Some parrots are cats. (IV) Some cats are green.
   (I) Statements: (i) Some cats are green.
   (II) All cats are parrots.
   (II) Conclusions: (I) Some cats are green.
      (II) Some cats are green.

83. Statements: (i) Some carpets are rats. (II) All carpets are windows.
   (I) All rats are carpets. (II) All carpets are windows.
(III) All windows are rats.
(IV) All rats are windows.

(a) Only (II), (III) and (IV) follow
(b) Only (I), (II) and (IV) follow
(c) All follow
(d) Only (I), (II) and (III) follow
(e) None follows

Answers with Explanation

1. (b) 2. (b) 3. (c) 4. (e)
5. (e) 6. (c) 7. (b) 8. (e)
9. (b) 10. (c)
11. (a)

12. (c) 13. (a) 14. (b) 15. (c)
16. (a) 17. (d) 18. (d) 19. (d)
20. (b) 21. (b) 22. (d)
23. (a)

24. (b) Some scooters fly it means some Scooters do not fly.
25. (d)
26. (e)

27. (d) 28. (d) 29. (a) 30. (d)
31. (d)

24. (b) Some scooters fly it means some Scooters do not fly.

53. (b) According to the statement (i), some essayists are poets, hence some essayist are not poets, therefore, conclusion (I) is false. According to the statements (i) and (iii) conclusion (II) is correct.
54. (b)
55. (b)
56. (d)
57. (a)
58. (c)
59.
60.
62. (e)
63. (e)

In this type of questions one statement followed by two conclusions is given. The candidate has to assume everything in the statement to be true even if it seems to be at variance from the commonly known facts and then decide which of the given conclusions logically follows from the given statements. The example given below will illustrate the idea clear.

**Example:**

**Statement:** If you are a good artist, then we have definitely a job for you.

**Conclusions:**
(I) You are a good artist.
(II) We are in need of a good artist.

64. (a)
